

Kosisochukwu Ibute

Product Designer

kosisochukwuibute@gmail.com | +353 852257522 | [Linkedin](#) | [Portfolio](#)

Product Designer with hands-on experience across e-commerce, marketplaces, and service platforms. I focus on simplifying complex flows, improving usability, and creating clear, accessible interfaces that align user needs with business goals. Strong in problem framing, AI-assisted workflows, and designing with measurable impact.

WORK EXPERIENCE

UX Designer

SoftZenith (Digital Agency), (Contract), Remote | Dec 2023 – May 2024

- Led on improving the core shopping and delivery experience for SomaGifts, starting with understanding where people were getting confused and what slowed them down during checkout.
- Using these insights, redesigned several key flows aligned with WCAG standards and simplified the number of steps involved to complete key tasks making navigation noticeably smoother for users.
- Introduced real-time order tracking with a clearer visual hierarchy, reducing the volume of support tickets from heavy weekly loads to a manageable level within six months.
- Streamlined checkout experience with multiple payment options, increasing the number of successful monthly transactions significantly.
- Collaborated in Agile sprints with PMs and engineers to deliver features on schedule

UX Designer

Skill4Cash (Part-time), Remote | Feb 2022 – May 2024

- Designed a dual-sided marketplace that made it easier for skilled service providers to be discovered, increasing their daily visibility and contributing to a 15% rise in customer connection requests. ([View Project](#))
- Redesigned onboarding flows using progressive disclosure, driving more new users to finish onboarding and stay active during their first week.
- Conducted regular iterative usability testing, and UX improvement that contributed to raising the app's rating from 2.0 to 3.5.
- Enhanced profile and search features to create smoother, more seamless client-provider interactions.

Junior Product Designer

Oravend (Contract), Remote | Dec 2021 – May 2022

- Supported senior designers in creating responsive layouts and simplifying complex transaction flows.
- Assisted in structuring multi-currency information architecture to improve usability for a global audience.
- Collaborated with blockchain engineers to design intuitive crypto workflows for non-technical users.
- Built foundational skills in UX research, wireframing, and accessibility practices.

EDUCATION

Master of Science, Human-Computer Interaction | Aug 2025

University College Dublin, Ireland

- Specialised coursework: AI Ethics, Interaction Design, Cognitive Psychology, Research Methods, and Real-world Design Projects ([View Project](#))
- Focus areas: Accessibility Design, Human-Centred AI, and Advanced UX Research Methodologies.

Bachelor of Arts, Mass Communication | Sep 2019

University of Nigeria Nsukka, Nigeria

RELEVANT SKILLS & TOOLS

- **Design & Technical:** Figma, Adobe Creative Suite (Photoshop, Illustrator, XD), Framer, RStudio, Protopie, Design Systems, HTML/CSS, Webflow, Jira(familiar).
- **Design & Product:** Interaction Design, UI Design, UX Research, Prototyping, Wireframing, Information Architecture, A/B Testing, Usability Testing, Accessibility (WCAG 2.1).
- **Collaboration & Management:** Agile Methodologies, Stakeholder Management, Cross-functional Collaboration, Notion, GitHub, Slack, Trello.
- **Industry Knowledge:** Fintech, E-commerce, Service Platforms, Marketplace Design, Mobile-First Design, Healthcare, EdTech/E-learning, Estate/Hospitality.
- **Emerging Technologies:** AI in Design, Generative AI Applications.
- **Open Source:** Collaborative design using Figma community.
